Website links to useful home learning resources

Music

The Royal Albert Hall's education and outreach team has put together various resources to enable you to discover a world of music from home: from an introduction to all the instruments in an orchestra, to singing and dancing along with stories, and build your own puppet theatre!

Barn owls

Bird Watch Ireland has a free ebook called *Golden Wings* which may be of interest to those children with a curiosity about the natural world. It takes the reader on a journey of discovery, providing an understanding of the lives of barn owls and the challenges they face as well as interesting facts about these birds.

Plants

This is an activity book called *Help Protect our Plants with Izzy the Inspector* and although it is designed for 6-11 year olds to work through, we thought 3-4 year olds might enjoy it with a parent. It explains about plants and the bacteria/viruses that can affect them, as well as setting out information on insects, nematodes and fungi.

Puppets

Little Angel Theatre has produced home learning resources for various age groups. For nursery aged children there are links to the stories of The Three Little Pigs and Velveteen Rabbit, as well as puppet making suggestions based around these books.

Coronavirus explained to children

This is a free digital book explaining Coronavirus to children, illustrated by Axel Scheffler (of Gruffalo fame).

Lego inspiration

Be inspired by record breaking lego structures, like the largest lego ship (built with 2.5 million lego bricks!) the tallest lego tower which was built in Milan and was over 35 metres in height and the largest cherry blossom tree built in Japan from over 800,000 lego bricks. Aim high!

Art

The Royal Academy holds a Young Artists' summer show for artworks by children aged 5-19 years. Enjoy the online exhibition and consider entering a piece when your child turns five years of age.

Royal Museums Greenwich

There are lots of online exhibitions, events and family activities to enjoy from the National Maritime Museum, the Royal Observatory and the Cutty Sark at the above link.

[STEM Laboratory](#)

This takes you to a STEM activity where you can make your own “Sprout House” from sponges and then plant it with seeds.

Thank you

We are very grateful to Liudmila, Max’s mummy, for bringing many of these resources to our attention.
